

**Better technology.
Better care.
Better outcomes.**

Welcome to Synzi

A virtual care company, dedicated to providing better ways for you to engage colleagues, patients and members, simply and efficiently.

Communication Platform

Our HIPAA-compliant platform is at the heart of our solutions, enabling better performance for healthcare organizations, better access for patients and members, and better outcomes for all.

Patient / Member Program Management Framework

Synzi's configurable framework enables providers and their staff to effectively address specific patient and member needs easily, and seamlessly.

Multiple Touchpoints

Offers more than a single touch to engage patients. Healthcare organizations can use our framework to schedule patient-centric communications across the care continuum.

Effective Engagement

Uses multiple modalities to bring care to the patient. Our framework includes video, audio, text and email messaging to help providers re-engage, monitor, and motivate patients. Providers can also use our platform to access specialists on-demand to provide diagnoses and decisions in emergent care situations.

Impactful Communications

Drives understanding amongst non-English speaking populations. As needed, a medically certified interpreter can be integrated into a video call. Email and text messaging can be translated into a patient's primary or preferred language.

Our state-of-the-art solutions make it possible for healthcare professionals to do what they do, only better.

Home Health Agencies

Synzi can help convert your staff's drive-time to patient-time by using virtual visits, secure messaging, email and text to augment or replace many in-home patient visits. Our communication platform can help your staff conduct at least 3 video-based patient visits for every 1 in-person visit. The Synzi platform enables your nurses to spend more time, more frequently, with patients and increases your staff's capacity to care for more patients. Available staff resources can be better utilized while travel time and related costs/liabilities are minimized. With Synzi, your administrator can also schedule a cadence of condition-specific messaging and health tips to your patients.

Health Systems

Whether your organization is a single site community-based hospital or has a large regional presence, our communication platform can help you enhance the timing and quality of the care your organization provides. We also partner with Rehabilitation, Skilled Nursing, Long-term Care, and related healthcare facilities and settings to avoid unnecessary readmissions and transfers by helping your onsite staff access offsite virtual care, on-demand.

Health Plans

Our communication platform can help your Care Management team conveniently engage your members at-home while reducing related travel time and transportation costs for your team and your members. During the virtual visit, providers and members can review progress, discuss next steps in the transition of care, and resolve any questions and emerging issues in real-time. Emails, texts, and SMS communications also keep your members on top of their adherence and informed about upcoming appointments.

Better technology.
Better care.
Better outcomes.

Our award-winning communication platform automates and optimizes workflows to help providers deliver virtual care on-demand, better engage patients, and avoid unnecessary and costly readmissions and transfers. Leveraging everyday devices such as smartphones, tablets and PCs, our platform can be used across all levels of cellular or Wi-Fi connectivity.
